

Jiali Thakkar

Student Graphic Designer

Profile

There is a beauty and a challenge in being able to weave and communicate a story visually. All throughout my life I've always been in touch with art and creativity whether it is through music, craft, dance, literature, photography, film and editing. However after exploring various art forms over the years, I found a belonging in designing, specifically graphic design.

I am in my third year of college and I aspire to draw inspiration from all the art forms that I have explored and sprinkle them in my design journey. I hope to always be curious and have space to learn more!
